Claims:

1. A laundry composition comprising a particulate
brightener, the particulate brightener comprising a
5 fluorescent whitening agent and a carrier, wherein the
particulate brightener has a deposition aid which
deposits the particulate brightener on to consumer
articles during the laundry wash process.
- 10 2. A laundry detergent composition comprising a
particulate brightener as claimed in claim 1, wherein
the deposition aid is a cationic polymer.
- 15 3. A laundry detergent composition comprising a
particulate brightener as claimed in any preceding
claim, wherein the carrier is urea formaldehyde.
- 20 4. A laundry detergent composition comprising a
particulate brightener as claimed in any preceding
claim, wherein the fluorescent whitening agent is
present at levels of from 0.01 to 50 wt % based on the
total weight percent of the particulate brightener.
- 25 5. A laundry detergent composition comprising a
particulate brightener as claimed in any preceding
claim, wherein the fluorescent whitening agent is
present at levels of from 0.0005 to 10 wt % of the
composition based on the total weight percent of the
composition.

30

- 42 -

6. A laundry detergent composition comprising a particulate brightener as claimed in any preceding claim, wherein the particle size of the carrier is from 0.01 μm to 50 μm .

5

7. A laundry composition of a particulate brightener as claimed in any preceding claim, wherein the laundry detergent composition comprises;

10 (a) from 5 to 60 wt % of organic surfactant,

(b) optionally from 5 to 80 wt % of detergency builder,

(c) from 0 to 50 wt % of particulate brightener, and

15

optionally other ingredients to 100 wt %.

8. Use of a particulate brightener as claimed in any preceding claim, to whiten consumer articles during the wash process.

20

9. A process for the laundering of textile fabrics which comprises a wash step in which the fabrics are immersed in an aqueous wash liquor comprising the particulate brightener as claimed in claims 1 to 7, a detergent surfactant, optionally a detergency builder and optionally other detergent ingredients.

25

10. A process for the laundering of textile fabrics which comprises;

30

- 43 -

(a) a wash step in which the fabrics are immersed in an aqueous wash liquor comprising a detergent surfactant, a detergency builder and optionally other detergent ingredients, and

5

(b) a rinse or pretreatment step in which the fabrics are immersed for at least 30 seconds in an aqueous rinse liquor comprising at least 1 wt % of the particulate brightener as claimed in claims 1 to 7, and a
10 deposition aid, and optionally a non-surfactant water soluble salt.
